HEBEI YESON INTERNATIONAL TRADING CO.,LTD
ANPING YESON WIRE MESH PROUDUCTS CO.,LTD
Add: NO.95 Qilian Street, Shijiazhuang, China.

COMPANY PROFILE

D.N.S Yeson Group was founded in 2008. We are an international business group specializing in the producing and exporting of garden products, construction materials, hardware, fencing, machinery, equipment and so on. As the business continues to grow every year Yeson Group has become one of the leading import and export companies in China.

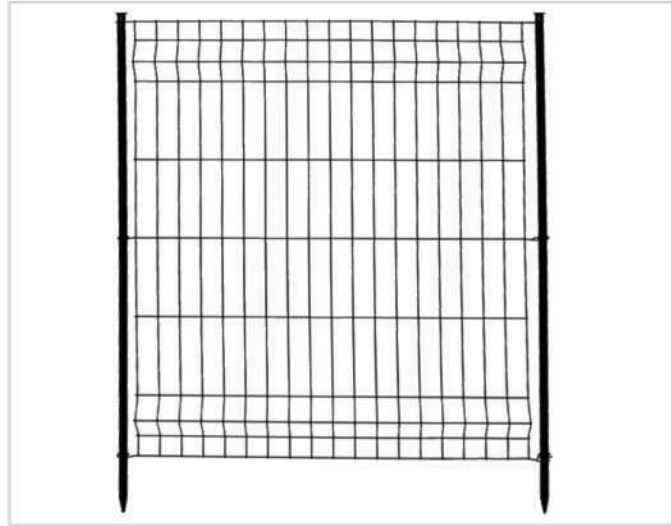

Now we have three branches in China and abroad with professional wire mesh factory, steel plate factory and professional import and export trading company. All products have obtained certificates such as CE, SGS, and ISO9001. Meanwhile, we are continuously acquiring related factories according to market changes to increase the Group's competitive advantage.

Yeson Group's value is based on integrity, quality, efficiency and excellence. We are proud of our ambitious, creative, young and well-trained team. Through professional and scientific operations we will continue to provide high-quality products, competitive prices and professional export services to all new and old customers.

MULTI-PURPOSE GARDEN FENCE

This garden wire fence is a structure used to surround gardens or courtyards with the main purpose of defining boundaries and protecting the plants and space within the garden. The presence of wire fence not only enhances the beauty of the garden but also serves a protection purpose of pet. Firstly, it helps prevent unwanted animals from entering the garden and avoids them from damaging plants or causing chaos. Secondly, the garden fence provides a boundary to protect the plants within the garden from strong winds or other harsh weather conditions. Thirdly, it can be spliced into different sizes and shapes according to your garden shape and the needs of different occasions, easy to change the layout. One of the metal panels is equipped with a latch so that this panel can be used as a flexible door.

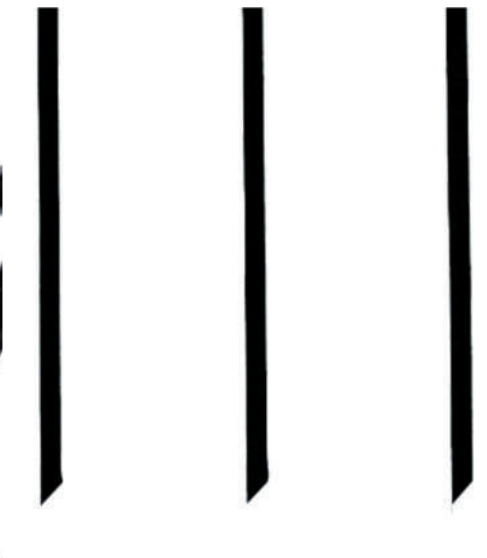

MULTI-PURPOSE GARDEN FENCE

ANIMAL BARRIER FENCE

Animal Barrier Fence is a revolutionary product designed to address the issue of digging animals, such as dogs, from escaping or entering restricted areas. With a simple yet effective design, Animal Barrier Fence acts as an underground barrier, preventing animals from digging under fences and boundaries. The Animal Barrier Fence system consists of durable and rust-resistant metal panels that are inserted into the ground along the perimeter of the desired area. These panels extend vertically and horizontally, creating an impenetrable barrier that no digging creature can overcome. The innovative design utilizes the animal's own natural instinct to dig by redirecting their efforts away from the protected area.

ANIMAL BARRIER FENCE				
Wire Thickness	Hole Size	Horizontal Wire	Panel Size	Color
5.0mm	2 inch	2 Line	24inch x 15inch	Black, Green, Grey are available
5.0mm	2 inch	3 Line	24inch x 15inch	

NO DIG DECORATIVE GARDEN FENCE

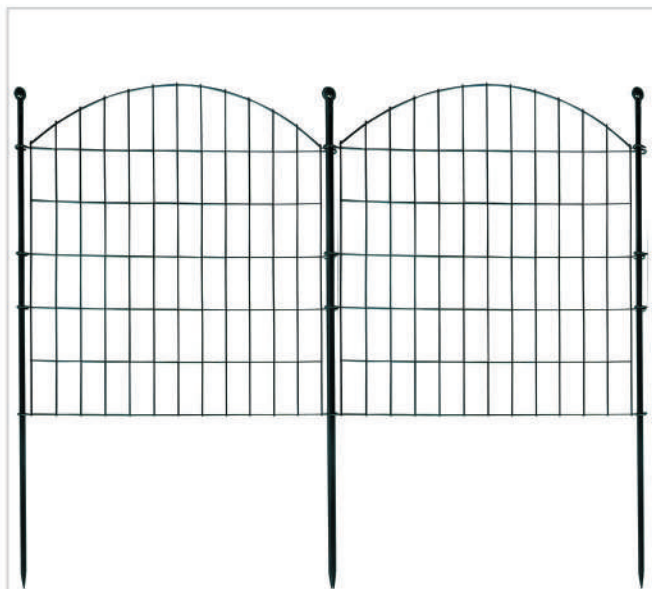

It was crafted with premium quality materials to ensure durability and longevity. Its sturdy construction provides reliable support, preventing intrusions from unwanted pests or animals. With its elegant design and various color options, this fence effortlessly adds a touch of sophistication to your outdoor space.

The installation is a breeze - simply insert the stakes into the ground and connect the fence panels together. No heavy equipment or special skills are required. Its modular design allows for customization, enabling you to adjust the size and shape according to your preferences.

This garden fence not only serves as a protective barrier but also a beautiful decorative element. Its intricate patterns and appealing aesthetics effortlessly complement any landscape or garden style. The low maintenance feature guarantees long-lasting beauty without the need for regular upkeep.

Product Details:

- Powder coated (different color)
- 27.5" H x 24" L
- Wire thickness 4mm
- Connected by stakes

CHICKEN WIRE CLOCHE

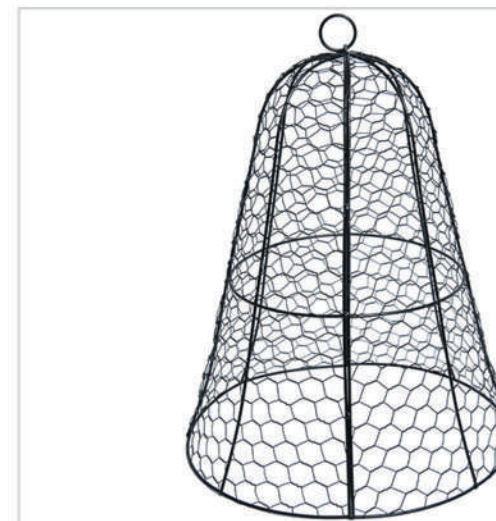

The Chicken Wire Cloche is a versatile garden protection device designed to safeguard and enhance the growth of plants. Made from sturdy and durable steel wire, it takes on the shape of a small, dome-like structure suitable for both indoor and outdoor planting environments.

This Cloche features a unique and elegant design that adds a touch of sophistication to your flower beds and gardens. It provides ample ventilation and transparency through its tightly woven wire mesh, allowing sunlight, air, and water to penetrate the plant's growing area seamlessly.

The Chicken Wire Cloche is easy to install and dismantle, making it perfect for gardening enthusiasts and professional gardeners alike. It is not limited to flower beds and gardens but can also be utilized to protect small plants indoors, such as in greenhouses, balconies, or rooftop gardens. The Chicken Wire Cloche is not only provides the ideal growing environment for plants but also adds a distinct charm to your gardening space. Whether you are an amateur enthusiast or a seasoned horticulturist, the Chicken Wire Cloche is your ideal gardening partner.

Product Size

- a. Bottom diameter: 13 inch
- b. Height: 15.7 inch

FENCE GATE

Panel Gate Square is universal for both 2D and 3D panel using quadrate posts. Available in single and double version. Mesh opening match most panel fences.

T POST

T POST is polyester coated steel profile laminated from special steel billet. Due to the special chemical composition of this steel billet, T post is super stronger than normal T profile. With pre stamped holes, it is very easy to install and level the fence. L stay is an equal angle beam attached between T post and ground to give extra support to T post. T post is popular budget option to install chain link fence and euro fence in Italian and French market.

SOLAR PANEL GUARD

This clip and wire mesh system prevents pest birds and animals from getting behind the solar panels and damaging the electrical or mechanical systems. The black PVC coated wire with 1/2 inch hole is fastened to the outside perimeter of the panels with a specialized clip that slips over the lip of the solar panel frame. Use a clip every 20 inch or less. This no drill solution provides long lasting and discreet exclusion.

Bird Screen Solar Panel Barrier will allow the maximum amount of air flow into and out of the area under the solar arrays. Along with birds & squirrels, it keeps out debris that could get stuck under the solar array and create a fire hazard.

Black 1/2" Mesh and Solar Panel Clips are sold separately.

SOLAR PANEL GUARD	
Item #	Description
WMPVC6X100	Solar Guard Black 1/2" mesh, 6" x 100' roll
WMPVC8X100	Solar Guard Black 1/2" mesh, 8" x 100' roll

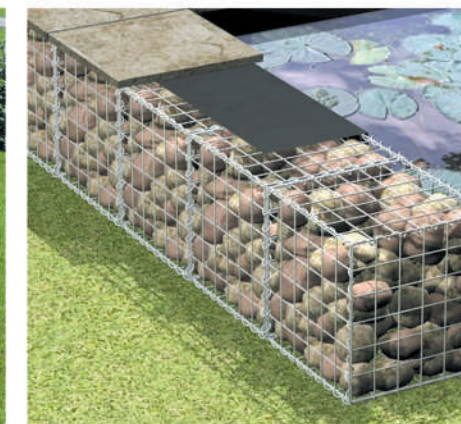

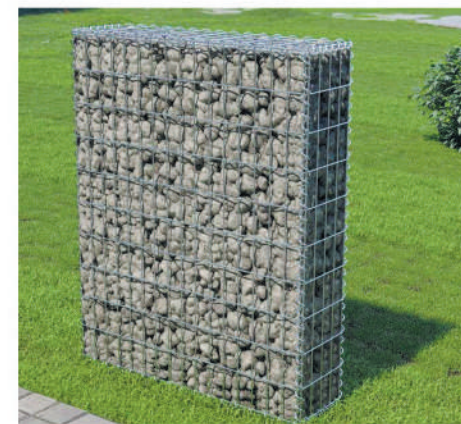

GABION FENCING MESH

Welded Gabion are made from flexible, lightweight, galvanized steel wire mesh that allows for machine filling, holds the alignment of the face. Welded gabions are faster to erect.

This allows them to keep their shape, to be free from bulges and depressions and fit easily against the wall.

Welded Gabion are used in many situations including the stabilization of earth movement and erosion, river control, reservoirs, canal refurbishment, landscaping, retaining walls and compound design

120x150	2.0-4.0	3	Or as request

POST CLIPS

Post Clips were crafted from high-quality low-carbon steel, hot-dip zinc-treated for powerful corrosion resistance, ensuring years of reliable use. It was made from 10-gauge wire to ensure durability and sturdiness. This kind post wire clips are versatile, fitting T-posts, U-posts, Y-posts, round posts, and more, meeting the varied needs of most sellers.

Products Details:
Wire Thickness: 10 Gauge
Surface: Heavy zinc coating

GARDEN RAISED BED

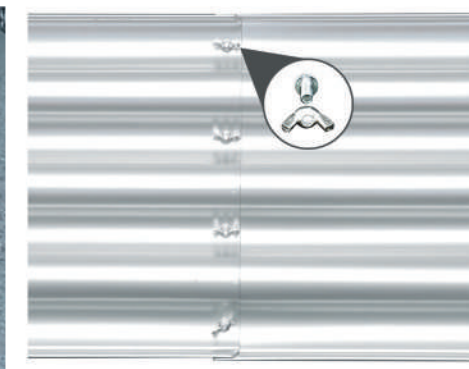

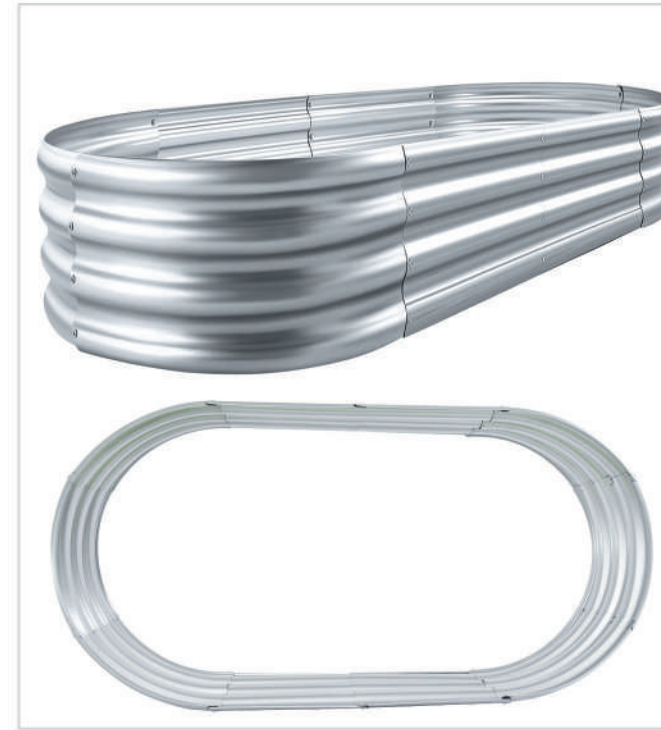

It is an innovative solution for your gardening needs. This sturdy and durable raised bed is constructed with high-quality metal, ensuring longevity and resistance to weather elements.

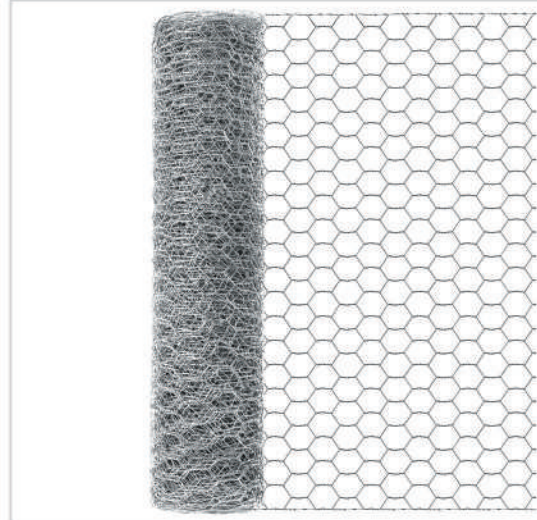

Designed with versatility in mind, this raised bed can be used for various purposes, including growing flowers, herbs, vegetables, or even as a decorative element in your garden. Its spacious dimensions allow for ample planting space, enabling you to create a flourishing and vibrant garden.

Assembly is quick and easy, thanks to the user-friendly design that requires no specialized tools. The metal construction ensures stability and strength, offering peace of mind knowing your garden will remain secure and intact.

Product Details:

- Heavy Aluzinc coated , Smooth edge, Stainless steel hardware
- Open at bottom
- 12" H x 48" L x 24" W
- Planting depth: 12"
- Assembly required

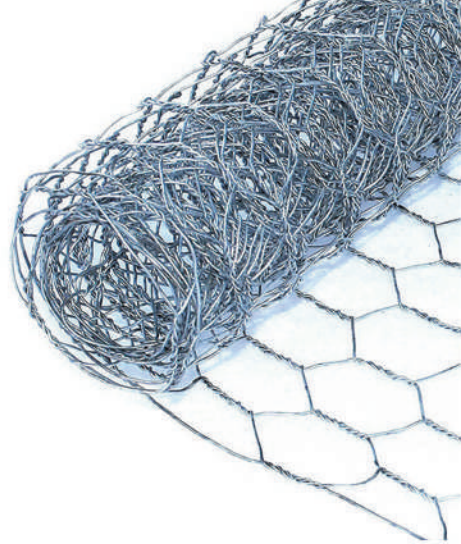

CHICKEN WIRE

Hexagonal wire netting is also known as chicken wire, chicken fencing and hex wire mesh, it was manufactured from steel wire which is then galvanized with zinc coating that provides the metal with a corrosion-resistant surface. If you opt for the PVC-coated version, the wire was to be galvanized and then coated with the PVC layer which offers added protection and weatherproofing. We offer a range of different lengths, heights, holes sizes and wire thicknesses throughout our chicken wire range. We also offer the majority of our roll sizes in the green PVC coated finish.

Surface treatment: electric galvanized before weaving, hot-dipped galvanized before weaving, hot-dipped galvanized after weaving, PVC coated.

The specifications can be customized according to your special requirements.

METAL PLANT TRELLIS

The intricate design of the metal plant trellis provides a sturdy framework for vines, creepers, and other climbing plants to latch onto and grow upward. By guiding the plants along the trellis, you can create stunning green walls, privacy screens, or living partitions in your garden or outdoor space.

Not only do metal plant trellises add a touch of sophistication to your landscape, but they also help optimize space by encouraging vertical growth. This vertical gardening solution is ideal for maximizing small garden plots, balconies, or patios, allowing you to enjoy lush greenery without sacrificing precious floor space.

Product Details:

- 14mm steel tube
- 71" L x 16" W x 71" H
- Assembly required

GREEN HOUSES

These structures offer a nurturing space where you can grow a wide variety of flowers, herbs, and other greenery with precision and care. The transparent walls and roof of greenhouses allow sunlight to enter freely while trapping heat, creating a warm and stable microclimate that promotes optimal growth. This controlled environment protects your plants from harsh weather conditions, pests, and other external threats, helping them thrive year-round.

With the ability to regulate temperature, humidity, and ventilation, greenhouses provide the perfect conditions for cultivating delicate flowers and herbs that may be challenging to grow outdoors. Whether you're a seasoned gardener or a beginner, these structures offer a versatile and efficient way to expand your gardening possibilities.

Product Details:

- Double Roller Zipper Doors
- transparent walls and roof
- 56.7" (L) x 18.9" (W) x 59" (H)
- 17-inch gap each tier
- Each tier with shelves
- Assembly required

GARDEN NETTING

The ultimate solution to protect your flowers and fruits from bird damage. This durable and lightweight netting is specifically designed to create a barrier that effectively deters birds from accessing your precious plants.

The fine mesh construction of the garden netting ensures that it not only keeps birds out but also allows sunlight, air, and water to reach your plants unhindered. This means your flowers can bloom and your fruits can ripen naturally while remaining safe from pecking and nibbling birds.

Easy to install and versatile in its application, this garden netting can be draped over trees, shrubs, bushes, or even laid directly onto garden beds. Its weather-resistant material ensures long-lasting protection, allowing you to enjoy a bountiful harvest without the fear of bird damage.

Product Details:

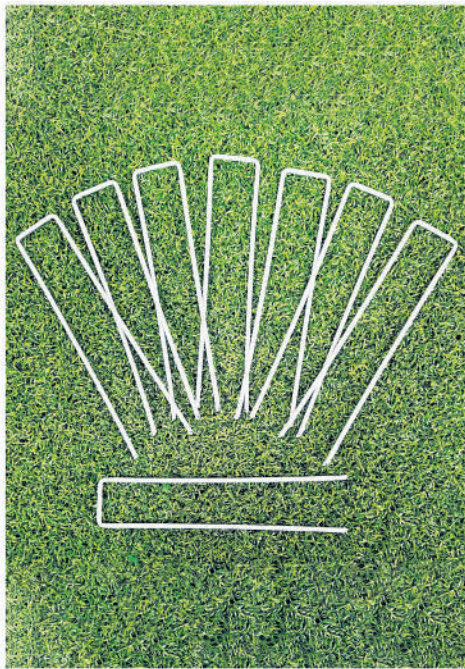

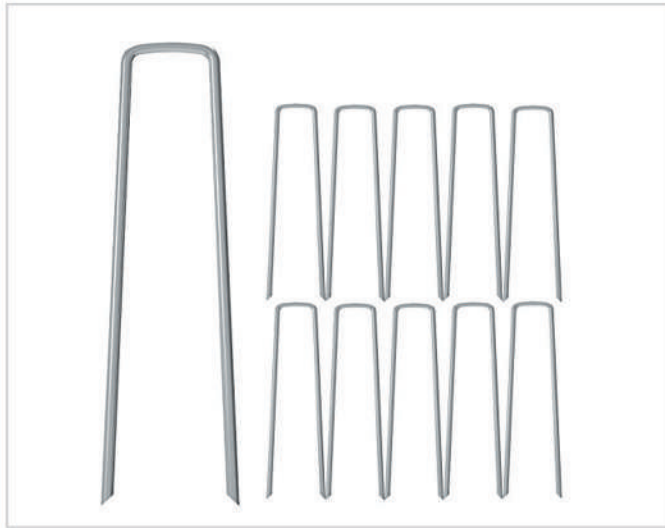

- Materials: PA
- Size: 3 x 8M or 5 x 10M
- Hole: 20*20mm

GARDEN STAKES STAPLES

Garden Stakes Staples are essential accessories for securing garden stakes firmly in the ground. These durable staples are made of high-quality metal and have a sharp end for easy insertion into the soil. They are designed to provide strong support for various types of garden stakes, helping to keep plants, vines, and flowers upright and stable. Garden Stakes Staples are a practical and reliable solution for ensuring the success of your gardening projects.

Products Details
Wire Thickness: 11 Gauge
Surface: Heavy zinc coating

PLANT TIES

Plant ties are used to secure plants to stakes or other supporting structures, ensuring that they grow in an upright position and avoid bending or breaking under the weight of their flowers or fruits. They can be used for various types of plants including flowers, vegetables, and shrubs.
